

Table A6.1. Hedges' *g* and tests of heterogeneity of MTI for Attrition.

Attrition	k	N	Hedges' <i>g</i> (95%CI)	<i>P</i> ^a	<i>Q</i>	<i>P</i> ^b	<i>I</i> ² (95% CI)
MTI vs							
Paper-based	4	457	0.01 (-0.17, 0.19)	.92	0.58	0.90	<.01 (<.01, 64.89)
Standard treatment	6	445	-0.31 (-0.86, 0.25)	0.28	35.66	<.001	86.61 (64.41, 97.77)

a: P-value of Hedges' *g* effect size

b: P-value of test for heterogeneity

k: number of studies

N: Total sample size across included studies

95%CI: 95% confidence intervals around the hedges' *g* effect size

Q: Measure of heterogeneity

*I*²: measure of heterogeneity

Figure A6.1. Forest plot of the standardised mean difference in attrition between MTI and paper-based group.

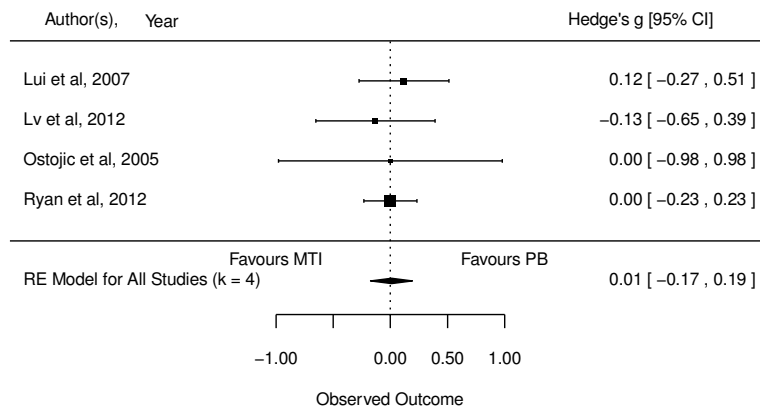

Figure A6.2. Forest plot of the standardised mean difference in attrition between MTI and standard treatment group.
